I . Overview of China-ASEAN Economic and Trade Cooperation

China-ASEAN FTA is the first FTA that China signed with other economies. And it is the biggest established FTA. ASEAN is made up by the ten member states of Indonesia, Malaysia, Philippines, Singapore, Thailand, Brunei Darussalam, Viet Nam, Lao PDR, Myanmar and Cambodia which covers 1.85 billion people and 1.4 thousand square kilometers. China and ASEAN Member signed the Framework Agreement on China-ASEAN Comprehensive Economic Cooperation at the sixth China-ASEAN Summit in November 2002. The establishment of China-ASEAN free trade area enhances the close economic and trade relations between the two parties, and also contributes to the economic development of Asia and the world at large.

According to the database of the commodity trade of the United Nations, China-ASEAN trade rose at an annual rate of about 20% from over \$50 billion to \$480 billion between 2002 and 2014. And the bilateral accumulated investment is over \$1000. China-ASEAN trade increased fast except that in 2012 since the Global Financial Crisis of 2008, and accounted for 11.16% of China's foreign trade. China-ASEAN trade had been in favor of the ASEAN side during the 2000-2011 period. But China's trade surplus appeared in 2012 and the surplus was \$44.53 billion in 2013. Increasing imports from ASEAN should receive much attention, and it will contribute to China's trade balance.

ASEAN has comparative advantages in products such as rice, fish, wood, etc. in terms of the weather and natural resources. China should import the products more from ASEAN. Since the entrance into the WTO, China's agricultural foreign trade developed fast, but China's agricultural imports increased faster than its agricultural exports and its agricultural trade deficit grew. On one hand, living standards improvement induces the rapid increase of high-quality agricultural products. On the other hand, China's agriculture faces strong competition as agricultural market is open. China-ASEAN agricultural trade developed slowly and the share of China's agricultural foreign trade decreased although ASEAN was still an important source of China's agricultural imports. Agricultural trade between China and ASEAN dropped by about 5% in 2013. The share of China-ASEAN agricultural trade in China's

agricultural foreign trade declined to 9.3% in 2013 from 10.4% in 2009. The gap between supply and demand of grain exists in China. China and ASEAN are complementary in agricultural products such as fruits, vegetables, fish and etc. These can contribute to economic and trade cooperation of the two parties. Since China-ASEAN FTA strategy was carried out, the two parties cut the import tariffs down and promoted trade facilitation such as the procedures of customs clearance, the etc. The bilateral trade liberalization has made great progress. ASEAN suppliers are lack of understanding import quota administration, inspection and quarantine, import operators, etc. in agricultural trade. This hindered the development of agricultural trade between the two parties.

China will widen the opening up to ASEAN, benefit ASEAN on a basis of equality and mutual benefit in the new era of deepening reform and expanding opening-up. Xi Jinping, China's president, pointed out, "China is pleased to improve China-ASEAN FTA, and will manage to bring the bilateral trade up to \$1 trillion by 2020", and "China is pleased to reinforce sea cooperation, make good use of the China-ASEAN Investment Cooperation Fund", and jointly build the 21st Century Maritime Silk Road. In the new era, to compile *The Guide of China's Imports from ASEAN* will inject new impetus into the bilateral economic and trade development.

II. Profile of China-Singapore Bilateral Trade

China-Singapore economic and trade cooperation has made substantial progress in recent years, the fields of cooperation have become increasingly extensive, the cooperation mechanism has been gradually improved, and the cooperation level has been elevated continuously. III. List of China's Agricultural Imports from Singapore

(I) Selection Method

The trade of agricultural products plays an important role in the China-ASEAN trade, thus ASEAN suppliers need a more particular knowledge on the application of quotas, inspection and quarantine of Chinese agricultural products. In order to prepare this guide, the main agricultural products that China imports from ASEAN shall be firstly determined. Regarding the HS 4-bit code as a basis of classifying agricultural products, in accordance with the ordering of sum of agricultural products that China imported from Singapore in 2014, the agricultural products ranking in the top 30 are selected.

(II) List of Main Agricultural Imports

The list of main agricultural products China imported from Singapore in 2014 is formed according to UNCOMTRADE. The non-agricultural products, such as industrial products, account for the major share of China-ASEAN trade. With the further promotion of China-ASEAN free trade area, the tariff level of products like industrial products has been significantly reduced, with relatively high degree of trade & investment liberalization and facilitation. In accordance with the ordering of sum of non-agricultural products that China imported from Singapore in 2014, regarding the HS 2-bit code as a basis of classification, the non-agricultural products ranking at the top are selected in the first 10 Chapters; then regarding the HS 4-bit code as a basis of classification, the non-agricultural products ranking in the top 3 of the first 10 Chapters above are selected respectively.

(II) List of Main Non-agricultural Imports

The list of main non-agricultural products China imported from Singapore in 2014 is formed according to UNCOMTRADE after the top 30 kinds of products are selected on the classification bases of HS 2-bit and HS 4-bit codes. In order to facilitate Singapore suppliers' export of relevant products to China, the supervision conditions of main non-agricultural products imported are listed in appendixes (see details in Appendix I and III).

13. For the entry of special articles, relevant approval documents or specified documents shall be provided.

(II) Customs Clearance

The procedure of customs clearance for China's imported products is composed of five basic links, including declaration, inspection, taxation, release and clearance. Declaration refers to the behaviors that a consignee or his agent of imported goods submits the verification certificate to customs and applies for the transaction of customs affairs. Inspection refers to the checks conducted by customs according to laws to the imported goods declared by the declarant, so as to confirm the conformity of documents, certificates and goods, check if there is any violation of laws and if the entry is legal, and prepare conditions for the next customs clearance procedure. Taxation means that customs charge the tariff for imported goods and the taxes for imported links according to relevant national policies, laws and regulations, including tariff classification, application of the tariff rate and import linkage tax rate, approval and determination of the duty-paying value, calculation and payment of taxes. Release is the last link of on-site operations of port customs supervision. Clearance means that customs implement inspections on the goods requiring follow-up management after the

port release within a specified period, and deal with the goods requiring supplementary certificates and payment for overdue taxes till all of customs supervision procedures are fully completed. The flow chart of China's product import is as follow:

For the customs clearance of agricultural products subject to import quotas management, the *Certificates of Import Tariff Quotas of Agricultural Products* shall be submitted according to relevant provisions of the *Interim Measures for the Administration of Import Tariff Quotas of Agricultural Products* (No. 4 Decree of the Ministry of Commerce and the State Development Planning Commission [2003]).

(III) Cooperation between customs and inspection & quarantine departments

According to the *Notification on the Comprehensive Promotion of Cooperation between Customs and Inspection & Quarantine Departments Issued by the General Administration of Customs and the State Administration for Quality Supervision and Inspection and Quarantine* (No.161 Decree of the General Administration of Customs and AQSIQ [2014]), since Aug. 1st, 2014, the “3 Ones” of cooperation between customs and inspection & quarantine departments has been comprehensively promoted to all directly competent customs and inspection & quarantine departments, all sites of customs clearance, and all goods and articles requiring customs declaration and inspection declaration pursuant to the laws, so as to achieve the maximum utilization of facilitation measures provided by customs and inspection & quarantine departments to benefit enterprises.

The “3 Ones” of cooperation between customs and inspection & quarantine departments refers to the “one-off declaration, one-off inspection and one-off release”. The “one-off declaration” refers to “one-off input and respective declarations”, which means that an enterprise only needs to input data for once, and the data will be respectively sent to customs and inspection & quarantine departments; the “one-off inspection” refers to “one-off unpacking that customs and inspection & quarantine departments jointly implement check/inspection & quarantine pursuant to the laws”, which means that both parties of customs and inspection & quarantine departments can jointly implement check/inspection & quarantine to the same batch of goods as required according to their different responsibilities and pursuant to the laws; the “one-off release” refers to “networking check and release of customs and inspection & quarantine departments”, which means that customs and inspection & quarantine departments respectively send the check and release information for goods arriving at ports, and the enterprise can transact procedures for taking delivery of goods by the check and release information of customs and inspection & quarantine departments.
